

WH Rogers Sheet Metal

"QUALITY METAL FABRICATION FOR OVER 41 YEARS"

Donner Laser Consulting
Attn: Brent Donner

November 9, 2007

Dear Brent,

I'm glad to finally have the opportunity to meet with you last week, while you were here to address some of the issues surrounding WH Rogers' Han Kwang 4k Koba laser..... I, and the two employees who assisted you here, were very impressed with your level of knowledge surrounding our Han Kwang machine, as well as, the Mazak that I also own. Moreover, I appreciated the enthusiasm you exhibited while informing and instructing us as to how we should approach keeping the machine's laser's internal integrity intact so that we may operate at peak performance.

Although we have attempted to some things properly, we weren't doing everything as we should have and this concerns me a bit.... Although, my employees were experienced laser operators, their experience revolved around our Mazak...

My company's best interest is most important to me, and I immediately felt that you shared this opinion or mindset as well. I can not adequately express my appreciation for your honesty and open candor.

Wendell Canipe – Vice President
